Recently graduated web development engineer from ESPRIT, focused on building secure, scalable web platforms with modern backend architectures and DevOps-aware practices.

Education

Engineering Degree in Web Development , ESPRIT, Tunis	2022 – 2025
Bachelor's Degree in Information Systems Development , ISET Djerba	2019 – 2022

Personal Projects

School Management Web Application (Multi-Tenant SaaS) in progress 2026

Design and development of a full-featured school management platform.

Technologies: Laravel 12, Next.js 16, PostgreSQL

Infrastructure: Microsoft Azure, Vercel, Neon PostgreSQL

- Built a unified platform covering attendance, timetables, work hours, grades, events, and enrollments.
- Enabled real-time communication between users through WebSocket-based chat.
- Designed a secure, multi-tenant architecture with role-based access RBAC and JWT authentication.

Live Demo: school-management-frontend-ashen.vercel.app

Pablo — Multiplayer Online Card Game in progress 2026

Real-time multiplayer card game.

Technologies: TypeScript, React, Vite, Node.js, Socket.IO, Express.js

Architecture: Authoritative server, unit-tested core logic

- Implemented a deterministic game engine to guarantee rule consistency.
- Built an authoritative Socket.IO server handling lobbies, turns, special card effects, and round progression.

Live Demo: pablo-sable-beta.vercel.app

Experience

Tunisie Booking — End Of Engineering Studies – Hotel Management Web Application Mars – Sep 2025

Design and development of a complete hotel management platform.

Technologies: Laravel, Next.js, MySQL

Infrastructure: Microsoft Azure (backend & database), Vercel (frontend)

- Centralized hotel operations including reservations, room management, and user access control.
- Simplified daily administrative workflows for hotel staff through the automation of contract creation and role-based access.
- Integrated an AI-assisted pricing suggestion feature to support better pricing decisions.

ROAM MAZE — Summer Internship Mai – Juin 2024

Web and mobile application for school administration and parent communication.

Technologies: React, Flutter, Node.js, MongoDB

- Improved communication between school administration and parents through a unified digital platform.
- Centralized announcements, notifications, and messaging across web and mobile applications.

BFI Groupe — Bachelor's Final Project Internship Jan – Juin 2022

Project versioning management system integrating GitLab and Artifactory APIs.

Technologies: Angular, Spring Boot

- Centralized project version tracking and artifact management in a single interface.
- Improved visibility and traceability between source code repositories and build artifacts.

Technical Skills

Programming Languages: Java, C#, PHP, JavaScript, TypeScript

Frameworks: Laravel, Spring Boot, Angular, Next.js, React, Flutter, Node.js, Symfony, .NET

Databases: PostgreSQL, MySQL, MongoDB, Oracle

DevOps & Cloud: Docker, Jenkins, Azure, Vercel, SonarQube, Grafana, Nexus

Concepts: Multi-tenancy, RBAC, JWT authentication, WebSockets, CI/CD, SaaS architecture

Languages

Arabic — Native | French — B2 | English — B2
